

# Li Mingliang

- Senior Software Engineer, Android.
- Xidian University, Computer Science and Technology, 2012.07 to 2016.07.
- Email: [matthewlee0725@gmail.com](mailto:matthewlee0725@gmail.com)
- Phone: (+86) 17601616091
- GitHub: <https://github.com/mthli> (4718🌟)
- Good at Java & Kotlin; familiar with JavaScript (React, Redux) / Golang / Python.

## Experiences

### Duozhuayu, Front-end & Full-stack Engineer, 2019.07 to Present

- **Open Collections.** An UGC project that users can recommend books to the collection, others can browse and purchase books in the collection.
- **Organize Book Info.** Some books may have the same ISBN, others may belong to the same publishing series, organize those info and display in book detail pages.
- **Customer Service System.** Users can feedback after-sales problems through WeChat, the system will auto create tickets and dispatch to our customer staffs.

### Zhihu, Android Engineer & Intern, 2015.07 to 2019.07

- **App Modularity.** Split business source code from Mono-repo to Multi-repo, so that improve compile time and good for QA. Also develop an Android Studio plugin [mthli/Nongfu](#) (37🌟) to resolve source code references faster and safer.
- **Zhihu Notion.** An UGC project like Twitter that users can share their thought fragments in Zhihu, used to be the second tab in App. Also develop a RecyclerView framework [zhihu/SugarAdapter](#) (217🌟) to reduce boilerplate code of Adapter by annotation processor.
- **Community Business.** Including question, answer and article detail pages, and a simple rich text editor in Android. Also participate in research and develop Zhihu's own hybrid framework (named "Mercury").
- **Zhihu Lite.** A lite version of Zhihu App. As the main developer, release 1.0 in 45 days.
- **Mirror.** An open source Sketch Mirror App for Android [zhihu/mirror](#) (272🌟)

## Personal Projects

- [Pirate FM](#). Yet another Podcast App for Android, release 1.0 in 2019, now have 270+ DAU and 2400+ MAU. Also recommended by [sspai](#) in this article [全平台播客订阅及收听指南](#)
- [mthli/Knife](#) (1970🌟). A rich text editor component based on EditText for Android.
- [mthli/Ninja](#) (918🌟). An open source Android browser with unique gesture interaction.
- [mthli/Slice](#) (600🌟). A drawable component that allows you custom round rect position.
